

**Ocean Waves polarized sunglasses not only reduce the amount of light that reaches the eye, but also eliminate glare and harmful UV-A & UV-B Ultraviolet light.**

**OCEAN WAVES ARE 100% POLARIZED:** From other eyewear providers polarization can vary typically from 15% - 100%. Ocean Waves offers you the highest quality polarization and UV protection available in the market and our unique construction and lens manufacturing process blocks all UV light up to 400 NM (nanometers).

#### **1<sup>ST</sup> & 6<sup>TH</sup> LAYERS**

Ocean Waves Lenses are made from the highest quality Crown Glass (Same glass used in Binoculars, video cameras, cameras, etc). Our glass lenses have zero distortion for clearer vision and the toughest materials to scratch.

#### **2<sup>ND</sup> LAYER**

Ocean Waves mirrors are encased between two glass lenses making the mirrors impossible to scratch, additionally they are vacuum sealed with 12 separate coatings to produce the utmost consistency with a distortion-free visual clarity. Available Ocean Waves exclusive colors are: Rio Plata Silver (Super Dark for full sun), 24Ct Gold (Coming Soon), Offshore Blue, Backwater Green, Lumination Purple (Sport Driving, Golfers, & Hunters).

#### **3<sup>RD</sup> LAYER**

Ocean Waves Polarization film is the best available in the market.

#### **4<sup>TH</sup> LAYER**

Ocean Waves uses a vacuum sealing process with the strongest adhesives for crystal clear bonding effect.

#### **5<sup>TH</sup> LAYER**

Ocean Waves uses a chemical bonding process for all of its scratch resistant coatings

#### **7<sup>TH</sup> LAYER**

Our Ocean Waves Anti-Reflective coatings are state of the art. Seven coatings of magnesium hexafluoride are thermally applied via our unique vacuuming process to the inside of the lens to ensure absolute consistency and resilience. The Anti-reflective (AR) coatings absorb "bounce back" of glare and UV light.

# OCEAN WAVES

Pleasing to the eyes... from both sides of the lens!

Polarized sunglasses not only reduce the amount of light that reaches the eye, but also eliminate glare and harmful UV (ultraviolet) light.

## Ocean Waves lenses are 100% polarized:

The degree of polarization can vary from 15% to 100%.

We offer you the best polarization and UV protection available on the market. The unique construction of our lens blocks all the UV light up to 420 nanometers.

**Try a pair on and see for yourself!**

Our anti-reflective coatings are state-of-the-art. Seven coatings of magnesium hexafluoride are thermally applied by a unique vacuum process to the inside of the lens to ensure absolute consistency. They absorb the "bounce-back" of glare and UV light.

Scratch resistant coatings

Adhesive, strongest made in the world

Ocean Waves polarization film is the best available on the market.

Mirrors are encased between two glass lenses making the mirrors impossible to scratch and they are vacuum coated with 12 separate coatings to produce the utmost in consistency and distortion-free visual clarity. Available in 24k Gold, Blue, Green, and Purple (best for golf) mirrors.

Glass lenses with No Distortion for clearer vision. Toughest material to scratch!

**Mirrored Lenses**

**Backwater Green™:** Ideal for flats fishing, snow skiing and cloudy days. Amber-based to brighten the view into the water and shadows. Preferred by many top fishing guides to achieve maximum reduction of glare, not light.

**Offshore Blue™:** A gray base lens specially designed for deep-water fishing and boating. Allows you to see the lines and baits clearly behind the boat, plus detect objects or fish on top of the water.

**Crown Royal Luminator™:** Our best lens for low level light situations such as early morn-
